

The EADS Group understands Pennsylvania's oil and gas laws relating to resource management; well construction; bonding, permitting, and registration of wells; environmental requirements for drilling operations; waste disposal; and waste management practices. We have experience in providing services for both intrastate and interstate gas pipeline industries. Our services range from conception and initial route selection through the various local, state and general permitting processes to the final as-builts and completion report packages.

**Act Fast.
Act Smart.
Act Efficiently.**

Expertise and Availability

Through over 50 years of extensive experience in Pennsylvania, The EADS Group has cultivated an intimate knowledge of local codes and processes. Our 6 office locations and over 200 employees ensure EADS has the resources and expertise to complete projects for you in a timely manner and to perform quality work at reasonable rates.

EADS employees work on a flexible schedule and give our clients mobile phone numbers by which we can always be reached. This allows us to work beyond the 'normal business hours' and service our clients to the fullest.

Overall, we are a practical company that works hard and values common sense. We tailor our efforts to meet our client's needs and deliver a quality product on time and within budget.
