

The EADS Group eliminates the constant problems of multiple contracts, conflicts, and gaps in responsibility by offering a wide array of environmental services - all under the direction and control of one company.

## One company - all you need.

- Design, Inspection and Planning
- Environmental Services
- Feasibility Studies
- Site Development
- Traffic Analysis
- Utility Coordination and Relocation

Innovative techniques allow The EADS Group to develop ingenious results. And, our professionals are familiar with federal, state and local standards. So, when EADS undertakes a project, a convenient and efficient transportation system is created.

## about us...

### QUALITY SERVICE WITH INTEGRITY

For over 50 years, The EADS Group has served federal, state and private clients in our community. We are a proven industry leader and continue to serve the region with our staff of dedicated professionals.

### EXPERTISE

Extensive knowledge and expertise is represented in over 200 committed professionals. When it comes to environmental services, we offer a "One Stop Shop" for all your project concerns. We offer the resources of many talented individuals with literally hundreds of successful projects to their credit.

### COMMITMENT

To you, our customer. To our community. To our firm. To quality. We are committed. As an employee-owned company, each member of the EADS team is invested and dedicated to providing only the highest quality work. Exemplifying our commitment is EADS' ISO 9001 certification. Our process-based quality management system puts customer satisfaction in the foreground of all our daily operations and ensures the successful completion of your project.

## Transportation Services

## Our Services

### Transportation Engineering

The EADS Group has been responsible for the design of over \$1 billion worth of roadways, highways and bridge construction projects.

Today, highway, bridge, and airport planning design and construction services are provided to State Transportation Departments, Turnpike Commissions, the U.S. Army Corps of Engineers, Counties, Municipalities, Authorities, and Private Developers.

Our designers have been trained extensively in the use of both Softdesk and Microstation survey, mapping and highway design computer software. This permits the generation of alignments, profiles and cross sections from the initial input of the raw survey data.

Our engineers and technicians also inspect in excess of 300 bridges on a continual two-year cycle. Our company led a multi-discipline team of Engineers, Geologists and Environmental Specialists to successful completion of one of the largest transportation improvement projects in PA - The Lewistown Narrows.

### Inspection Services

Depending on the magnitude of a project, construction inspection teams can vary in size. Regardless of the size of the project, The EADS Group has the right number of employees to inspect and manage construction projects and material testing work. Inspectors will interpret contract requirements by analyzing specifications and drawings and by applying a variety of testing and inspection techniques to ensure safety and completion of your project in a timely manner.

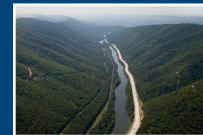

### Highways

EADS designs new highways and restructures existing roadways.

Our most high-profile project was the reconstruction of The Lewistown Narrows.

The project included ground-breaking engineering techniques to stabilize the steep slopes around the roadway, intense environmental mitigation and sensitivity, a grueling year-round construction schedule and much more.

The project has been recognized nationally and has won several awards.

### Structures

Our experience includes design management and inspection of multi-span bridges, stabilized retaining walls and historical structures. We also assist with the bidding process to obtain qualified contractors.

During the last 10 years, more than 100 bridge improvement projects have been designed and completed using PennDOT criteria.

Our experience includes:

- Bridges over Rivers and Streams
- Bridges over Railroads
- Bridges over Roadways
- Bridges over Both Railroads and Streams

For a more detailed listing of our project experience, contact us today!
